Issues in NASA Program and Project Management

A Collection of Papers on Aerospace Management Issues

National Aeronautics and Space Administration

Summer 1990

PAGE	TITLE	AUTHOR
1	<u>The Right Attitude for the Program Manager</u> The Chief of the Astrophysics Division's Flight Programs Branch of the Office of Space Science and Applications (OSSA) reflects upon the specific characteristics and attributes expected in the Division's managers.	Douglas R. Broome
7	<u>Program Control for Mission Success</u> The senior principal staff member in the Space Science and Applications Group of BDM International, Inc., and former Director of Flight Projects at the Goddard Space Flight Center (GSFC) offers practical advice and a common sense approach to program control.	G.W. Longanecker
11	<u>Performance Measurement: A Tool for Program Control</u> Abell was recently selected as the Chief of the Administration and Resources Management Office of Goddard's Space Sciences Directorate. Her 19 years of program analysis and financial and resources management culminated in developing and implementing the Center's Performance Measurement System.	Nancy Abell
19	<u>Managing SRM & QA Throughout the Project Life Cycle</u> An Associate Administrator explains how managers can get the best from their SRM&QA engineering and technical support by incorporating principles of Total Quality Management to conserve money and time while ensuring safer mission performance.	George A. Rodney
23	<u>Advantages of Cost Plus Award Fee Contracts</u> Personal and shared experiences convince this veteran that a cost plus award fee contract is preferred for high-tech, one-of-a-kind development projects. The former Associate Director of Programs at the Goddard Space Flight Center (GSFC) offers nine reasons why, plus lessons learned from fee determinations.	William C. Keathley
29	<u>COBE: Lessons Learned from the Management of FIRAS</u> The systems engineer for the Far Infrared Absolute Spectrophotometer (FIRAS) instrument on the recently launched Cosmic Background Explorer (COBE) does an instant analysis of a dozen management problems and offers solutions while they are still fresh in his mind.	Mike Roberto
33	<u>Management of Small Projects: Streetfighting in the NASA System</u> The Manager of New Initiatives at the Johnson Space Center (JSC) shares his experiences in the art of streetfighting in the NASA system, suggesting that small projects be run like a real business (while adding some of Kelly Johnson's basic operating rules).	William J. Huffstetler
37	<u>Age Distribution Among NASA Scientists and Engineers</u> This senior system safety engineer for the Space Station Freedom Electric Power System at Lewis Research Center has been tracking the age gap between oldtimers and newcomers to NASA for several years now. Having documented the age disparity, he offers several recommendations to avert a personnel shortfall.	Michael L. Ciancone
45	<u>Resources for NASA Managers</u> Reviews, anecdotes and notices of value and interest.	

SP-6101(03) *Issues in NASA Program and Project Management* is third in a series from NASA's Program and Project Management Initiative. This series is collected and edited by Francis T. Hoban with Dr. William M. Lawbaugh. Statements and opinions are those of the authors and do not represent official policy of NASA or the U.S. Government. Useful and enlightening material is welcome, and diversity of ideas is encouraged.

Inquiries should be directed to Francis T. Hoban, Program Manager, Office of Human Resources and Organizational Development, Code ND, NASA Headquarters, Washington, D.C. 20546-0001.
