ISSUES IN NASA PROGRAM AND PROJECT MANAGEMENT

edited by

Francis T. Hoban

Program Manager

NASA Program and Project Management Initiative

Issues in NASA Program and Project Management

A Collection of Papers on Aerospace Management Issues

National Aeronautics and Space Administration

Spring 1991

PAGE	TITLE	AUTHOR
1	<u>To the Next Generation of Program and Project Managers</u> NASA's Deputy Administrator, a nationally recognized propulsion expert who has managed major space programs and directed major research and development efforts at Marshall Space Flight Center and Princeton University, suggests three basic qualities for the aspiring program or project manager.	J.R. Thompson
5	<u>Project Management in NASA: 1980 and Today</u> The former Director of Langley Research Center and now professor of aerospace engineering and engineering management at the University of Colorado reflects upon his 1980 study of NASA program and project management and delineates several experience-proven principles.	Donald P. Hearth
11	<u>Building the Project Team</u> A veteran of the Viking project, now with the Craf/Cassini Program at NASA Headquarters, analyzes a unique effort in team building on the National Aerospace Plane project and applies the theory to international competition in high technology.	Howard T. Wright
16	<u>Space Science and Satellite Applications: Ingredients for Success</u> The retired Director of Goddard Space Flight Center wrote an insightful and inspiring memorandum in 1963 to Goddard Space Flight Center branch heads and project managers, outlining ingredients for success based upon past practices, policies and rules.	John W. Townsend, Jr.
19	<u>Program Control: A Growing Career Opportunity</u> A 25-year veteran of NASA, now a principal in Hardy & Associates, defines program control and discipline training at Marshall Space Flight Center where he served as Director of the Program Planning Office.	Bill Sneed
25	<u>Shared Experiences from NASA Programs and Projects: 1975</u> At a National Academy of Sciences workshop in 1975, NASA and the National Academy of Engineering heard from 15 managers who analyzed lessons learned in cost control, definition and planning, requirements, technical results and management techniques, all useful for future planning. Part one of two parts.	Frank Hoban
35	<u>Space Science: What's Wrong at NASA</u> Shortly before the launch of the Hubble Space Telescope, the principal investigator for the high-speed photometer on the HST and professor of astronomy at the University of Wisconsin-Madison suggested renewed vitality in NASA space science.	Robert Bless
45	<u>Resources for NASA Managers</u> Book and video reviews on management experience of value and interest to program and project managers.	William M. Lawbaugh

SP-6101(04) Issues in NASA Program and Project Management is fourth in a series from NASA's Program and Project Management Initiative. This series is collected and edited by Francis T. Hoban with Dr. William M. Lawbaugh. Statements and opinions are those of the authors and do not represent official policy of NASA or the U.S. Government. Useful and enlightening material is welcome, and diversity of ideas is encouraged.

Inquiries should be directed to Francis T. Hoban, Program Manager, Office of Human Resources and Organizational Development, Code NHD, NASA Headquarters, Washington, D.C. 20546-0001.
