

Resources

This bibliography was compiled by Susan Manakul, Program/Project Management Librarian at NASA Headquarters Library.

The following resources are located in the Program/Project Management Collection at the NASA Headquarters Library. A few may be part of other collections in the Library. The designation before the call number indicates the collection. All items are available to NASA employees at all NASA installations. For more information, call the PPM Librarian at 202-358-0172.

Federal Laboratories/ National Technology Transfer Center

Seventeen different federal government agencies operate 700 federal laboratories employing over 100,000 engineers and scientists. The National Technology Transfer Center was established by Congress in April 1991 and funded through a cooperative agreement with NASA to be the link between the federal laboratories doing the research and private industry where the technologies can be brought into the marketplace.
